

2006 Oregon Hard Winter Elite Yield Trials - Hermiston

Site Quality Index[†] = 2

1 = Poor 3 = Average 5 = Excellent

Site Description: Environmental conditions adversely impacted the site.
Late seeding, heat stress, and plot damage resulted in limited yields and the loss of one replication.

Entry	Variety	Class	2006 Yield Data		2006 Agronomic Data		
			Yield bu/ac	Rank	Test Weight lbs/bu	Plant Height cm	Protein %
13	OR2052069H	HWW	128.3	1	60.8	94.0	8.8

	CV (%)		4.3		3.5	4.4	4.5

[†] The Site Quality Index is based on the relative performance of check varieties to historical means and the degree of variability found within the trial.

Site Quality Index Descriptions:

1 = Poor; Site highly impacted by unusual environmental conditions making data unpubishable

2 = Below Average; Site was impacted by unusual environmental conditions. Variability was high.

3 = Average; Site was average with normal/acceptable environmental conditions. Variability was medium.

4 = Good; Site was representative of surrounding area with minimal environmental impact. Variability was low to medium.

5 = Excellent; Site was highly representative of surrounding area with no environmental impacts. Variability was very low.

* Indicates check variety.
